JHUDIEL ADRIAN B. ARTEZUELA

Full-Stack Developer, Automation & QA Engineer

Estaca, Tunghaan, Cebu City, Cebu | (+63) 956-538-4687 | jhudzartezuela@gmail.com | github.com/adrianjhudiel

PROFESSIONAL SUMMARY

Results-driven Information Technology graduate and Performance-Based Associate with hands-on experience delivering full-stack web, mobile, and automated business applications end to end. Skilled in architecting modular backend systems with NestJS, TypeScript, Spring Boot, and Python, alongside optimized PostgreSQL and MySQL databases, with a proven record designing business-automation architectures and lead-management pipelines using GoHighLevel. Known for rapidly self-teaching new technical disciplines under real deadlines. Most recently built working QA/testing proficiency in under a day, without a dedicated QA lead in place, to independently validate an AI-assisted product feature end to end.

CORE SKILLS

Backend: NestJS, TypeScript, Java, Spring Boot, Python

Frontend & Mobile: React, HTML5, CSS3, Android Studio, Kotlin

Databases & Automation: PostgreSQL, MySQL, GoHighLevel

QA & Testing: Manual & Functional Testing, Regression Testing, Test Case Design, Bug Tracking & Triage, Software Quality Assurance Fundamentals

Tools & Collaboration: Git/GitHub, ClickUp

PROFESSIONAL EXPERIENCE

MetaWatt LLC — *Performance-Based Associate (formerly Technical Intern)* *Jan 2026 – Present*

- Promoted from Technical Intern to Performance-Based Associate for consistently driving impactful technical initiatives and scaling business-automation pipelines.
- Self-taught software QA/testing methodology in under a day after being assigned a testing initiative with no dedicated QA lead on the team and no prior professional testing background, then delivered results technical leadership approved on first review.
- Applied that self-directed QA process to independently test an AI-assisted client chat/portal feature end to end, using Claude Code to help design and run test cases, covering manual and regression checks, defect logging, and fix verification before release.
- Built and shipped multiple features for the company's AI orchestrator platform (surplus_ai_orchestrator), including AI-assisted client-portal capabilities, expanding its automation and integration footprint.
- Designed and refined complex database modules using advanced SQL architecture standards, improving structural integrity and query performance.
- Assisted in building automated lead-management and operational-intake workflows using GoHighLevel, supporting lead-to-client handoff.
- Collaborated cross-functionally on backend development and standardized boilerplate project setups, accelerating new-project onboarding.

TECHNICAL PROJECTS

Cyber Kids — *Capstone Project, Game Engine / Lua*

- Engineered immersive in-game models, custom animations, and game logic in Lua using a built-in animation editor; co-presented research at ICE 2025, Silliman University, to promote Cyber literacy awareness.

FurryFriends — *ReactJS, Spring Boot, Java*

- Built front-end and back-end functionality for an appointment-scheduling web application for veterinary hospitals.

ParkTrack — *Python, Django*

- Designed clean user interfaces and end-to-end booking flows for an intuitive parking-reservation system.

CollaborAid | MyTravelPal | Deluge Adventure TD — *Android/Kotlin, Java*

- Built a collaborative community-help platform with Google Cloud services and level-progression mechanics (CollaborAid); engineered real-time itinerary features (MyTravelPal); developed a 2D pixel tower-defense game with custom grid mechanics (Deluge Adventure TD).

EDUCATION

Cebu Institute of Technology – University — Bachelor of Science in Information Technology *Cebu City, Cebu*

Relevant coursework: Software Quality Assurance & Testing, Database Management Systems, Web & Mobile Application Development

Cebu Institute of Technology – University — Senior High School Graduate, With Honors *Cebu City, Cebu*

Saint Cecilia College Cebu, Inc. — High School Graduate *Minglanilla, Cebu*
